## ■ Revision of “Objectives” Section 2-2

2.2 In addressing these objectives, the Expert Group may be involved in the following types of activities, depending on the level of available funding and member-economies' priorities relating to renewable energy development:

- to develop a roadmap to double the share of renewables from 2010 levels in the APEC energy mix by 2030, including in power generation;
- to promote research, development, deployment, demonstration, and commercialization of clean and low-carbon energy technologies;
- to facilitate workforce transitions, reskilling, and upskilling to accelerate clean, sustainable, just, affordable, and inclusive energy transitions;
- to conduct research and sharing best practices to fulfill APEC Leaders' energy commitments, including carbon intensity reduction and expanding renewable energy access;
- to enhance cooperation among APEC economies, international organizations, and stakeholders to minimize duplication of efforts through joint projects, workshops, and initiatives;
- to facilitate knowledge sharing on energy-smart communities through the Energy Smart Communities Initiative (ESCI) Knowledge Sharing Platform (KSP) and the ESCI Best Practices Awards;
- to advance smart energy/power systems by deploying intelligent grids and digital technologies including Artificial Intelligence to enhance the flexibility, resilience and reliability of power systems;
- to promote Just Energy Transitions by integrating gender equality, well-being, and inclusive development in renewable energy deployment, ensuring engagement of MSMEs, Indigenous Peoples, and remote communities;
- to monitor and evaluate progress of implementing the APEC Policy Guidance on clean and low-carbon hydrogen frameworks.

# ToR Updates

## ■ Updates to ensure relevance and inclusivity

- to promote urban sustainable development in the APEC region through sustainable cities development and the exchange of best practices on deployment of new and renewable energy technologies combined with smart grid, energy efficiency, etc.;↵
