

**Enhancing Climate Change Adaptability and Resilience
of Energy Infrastructure toward Carbon Neutrality Using
Renewable Energy Scheme
(EWG 207_2024A)**

**DEDE, Ministry of Energy
THAILAND**

**EGNRET 64
Bangkok, Thailand**

Co-sponsoring economies

- Chile
- China
- Hong Kong, China
- Japan
- Philippines
- Viet Nam

Project's Objectives

- This project is to promote a preparedness/mitigation plan and participate in actions(response) to enhance climate adaptability and resilience of energy infrastructure through the 2-day workshop.
- The share information, experience, will be summarized as part of the recommendation and disseminate among APEC economies.

Project's Current Progress & Next Steps

- Successful Procurement of Contractor The re-tendering process for the research consultant has been successfully completed.
- Contract Executed The APEC Standard Project Contract was officially awarded to Chiang Mai University (CMU), and fully endorsed by the APEC Secretariat.
- Project Kick-off The research phase will officially commence on 1 April 2026.

Project's Revised Timeline

April 2026	Project Kick-off with Contractor (CMU)
April - August 2026	Research, Data Collection, and Survey implementation across APEC economies
September - October 2026	Hosting the 2-Day Capacity Building Workshop in Thailand
March 2027	Final Summary Report Publication and Project Completion
