Asia-Pacific
Economic Cooperation

EGNRET

3. Develop Cleaner Energy Sources:

Page 1/3

APEC Member Economies meet their energy needs in a way that minimizes the impact on the environment and is safer for future generations.

Key to meeting our clean energy generation objectives are:

a) developing effective policy recommendations for addressing impediments to the increased use of renewable energy technologies and for including renewable energy in domestic energy plans.

b) conducting renewable energy resource assessments to facilitate a thorough understanding of renewable energy resource availability in APEC-member economies.

3. Develop Cleaner Energy Sources:

Page 2/3

c) supporting the development and commercialization of renewable energy technologies so as to make them economically viable in a wide range of applications;

[goals for the APEC 21st Century Renewable Energy Development Initiative?]

c) educating industry, financial institutions, governments, technical assistance providers and educational institutions on the benefits of renewable energy and the issues associated therewith;

d) engaging in renewable energy technology assessment and related activities to demonstrate the cost-effectiveness of renewable energy applications;

3. Develop Cleaner Energy Sources:

Page 3/3

- f) developing the human resource base within member economies to improve their analytical, technical, operational and policy capacity in the area of renewable energy development;*
- g) facilitating improved reliability and stability in the provision of energy supply to meet demand; [Shared objective with “Promote Energy Efficiency and Sustainable Communities” section; Goals for the APEC Smart Grid Initiative?]*

Next Expert Group Meeting
