Kuala Lumpur, 26-27 April, 2010**

RDL

2010 APEC Funding

New Zealand wishes to promote an EGNRET initiative entitled:

Guidelines for Introduction of Renewable Energy

The idea is to set up a series of projects that will provide information on how different economies have been successful in bringing Renewable Energy into the Market, with Guidelines for how to do this.

A suggested sequence is:

**Wind, Small Hydro, Electric Vehicles, Solar, Biofuels,
Marine energy, etc.**

21st Century R E Initiative - Advanced

2010 APEC Funding

An initial Proposal might be:

Guidelines for the Implementation of Wind Power.

This project is designed to gather information on how Wind Power has been commercialized in APEC and other economies and to assemble the lessons learned, and the business models employed, in its implementation.

The outcome of the project will be a set of Guidelines that can be used, both by Government agencies and industry proponents, in the development and implementation of Wind Power, building on experience gained in other economies.

These Guidelines can serve as both a tool kit and roadmap for the introduction of Wind Power into the marketplace.

The Beneficiaries of the project will be both government agencies and industry proponents.

2010 APEC Funding

The idea is that the EGNRET should:

- **Adopt this initiative as part of its short and middle term strategy for promoting the commercial development of Renewable Energy,**
- **Plan to pursue funding for projects on each RE form as it considers appropriate,**
- **Build up an Information Base of Reports providing Implementation Guidelines for the Commercialisation of each type of Renewable Energy.**

This will make a Serious Contribution

Thank You!
