USA Project: Using Smart Grids to Enhance Use of Energy Efficiency and Renewable Energy Technologies (EWG 01/2009S)

- ▶ This US self-funded project will examine the status and potential within APEC economies of smart grid technologies to enhance the use of renewable energy and energy efficient buildings, appliances and equipment
- ▶ A detailed survey was sent out and the results are being analyzed
- ▶ The project is on time, and should be completed by March 2011
- ▶ A follow on workshop will take place to examine findings of the study and lay a path forward for future progress in these areas.
