

Proposed Topic of Policy Dialogue for EWG 58 &59

“Renewable Energy Transition for Sustainable Growth”

Graphic Source: Deloitte Analysis

Capitalising on current global commitment and emerging trend for sustainable development

- to reduce CO2 emission
- to diversify energy mix
- to ensure energy reliability
- to create a circular economy and new sources of growth

Key Areas for discussion

RE deployment to catalyst socio-economic growth and to meet demand for reliable, affordable & environmentally responsible energy

Thank You
